

FSL Machine Embroidery Design Napkin Ring

You will need:

1. SKU 1081 FSL Machine Embroidery Design Christmas Star Napkin Ring
2. Water-soluble stabilizer
3. Suitable machine embroidery thread

Note: We find that polyester thread is especially suitable for these designs. In order to have the stitched out embroidery look the same on both sides, we would recommend that you use the same upper thread and bobbin thread.

Step-by-step instructions

1. Hoop the watersoluble stabilizer. Depending on the type of stabilizer you are using, you have to hoop from a minimum of 2 and up to 4 layers.
2. Stitch out the design components. Carefully cut off the loose thread ends you get in the process of stitching (at the beginning or when changing thread).
3. Cut away the excess stabilizer.
4. Follow the instructions of your stabilizer's manufacturer. Please do NOT leave the components in water for too long. Just wait until there are no visible traces from the stabilizer.
5. Get the Napkin Ring components out of the water, place them carefully on a towel and let them dry. Once they are dry - iron them. Do NOT iron them directly. Cover the embroidery with a soft fabric instead.
6. Join all the parts together.
7. Your Napkin Ring is ready!
